

Smart Snacks with MyPlate

Healthy students learn and behave better. Students who eat well fuel their brains for success in the classroom. New brain research shows that both nutrition and physical activity positively affect academic achievement. Schools can help students be ready to learn by offering snacks from MyPlate—including whole grains, low-fat dairy, fruits, vegetables and lean proteins.

The Smart Snacks in School rule (starts July 1, 2014) will establish nutrition standards for all foods and beverages sold on school grounds during the school day. The rule allows schools to gradually phase in the changes over the first year.

What areas will the rule affect?

The rule will affect all foods and beverages sold outside of the school lunch and breakfast program, during the school day. A school day is defined as midnight to 30 minutes after the school day ends.

- ⇒ Foods sold a la carte within the food service
- ⇒ School stores
- ⇒ Vending machines
- ⇒ Snack bars
- ⇒ Food-based fundraisers that take place during the school day

What areas will the rule not affect?

The rule will not affect food sold after school, on the weekend, and off campus. Examples include:

- ⇒ Concessions
- ⇒ Food and snacks that students bring from home
- ⇒ Classroom events (birthdays, holiday parties, etc)
Although schools may consider this area as an opportunity for positive change.
- ⇒ Teachers' lounges

Schools are Stepping up to the Plate: Fueling Students with Smart Snacks

Children consume almost half of their daily food intake at school. Research shows students who eat well learn and behave better throughout the school day. Schools already know that healthy snacks boost performance during standardized testing days. The Smart Snacks in Schools Rule applies this knowledge to all snacks sold during the school day. The rule ensures all snacks available through vending machines, student stores, snack bars, and ala carte lines are healthy options. Schools can help students succeed by offering snacks from USDA's MyPlate.
